

Chemical & Pharmaceutical Bulletin

Published by the Pharmaceutical Society of Japan

Scope

We cordially invite you to contribute and subscribe to the Chemical & Pharmaceutical Bulletin (CPB) and the Biological & Pharmaceutical Bulletin (BPB). The Journals are international ones officially published by the Pharmaceutical Society of Japan, established in 1880, whose current members are over 20,000. These journals are distributed worldwide. The manuscript shall be published in English as Regular articles, Notes, Communications, Reviews, or Current topics. Originally, CPB covered all aspects of the pharmaceutical sciences, however, since the topics covered by the above journal became increasingly diverse, as a new sister journal, BPB was created in 1993, also as a continuation of the Journal of Pharmacobio-Dynamics published since 1978. Now CPB covers physical and inorganic chemistry, organic chemistry, natural products chemistry, medicinal chemistry, analytical chemistry, pharmacognosy, and physical pharmacy. On the other hand, BPB covers analytical biochemistry, biochemistry, molecular and cell biology, microbiology, pharmacology, medicinal chemistry, pharmacognosy and biopharmacy, including all fields of life sciences such as genomics, proteomics, bioinformatics, structural biology, chemical biology and so on.

The publication of this journal has been supported in part by a Grant-in-Aid for Publication of Scientific Research Results from the Japan Society for the Promotion of Science (JSPS), which is gratefully acknowledged.
